Team Password Manager

Password Management Software for Groups

What is Team Password Manager

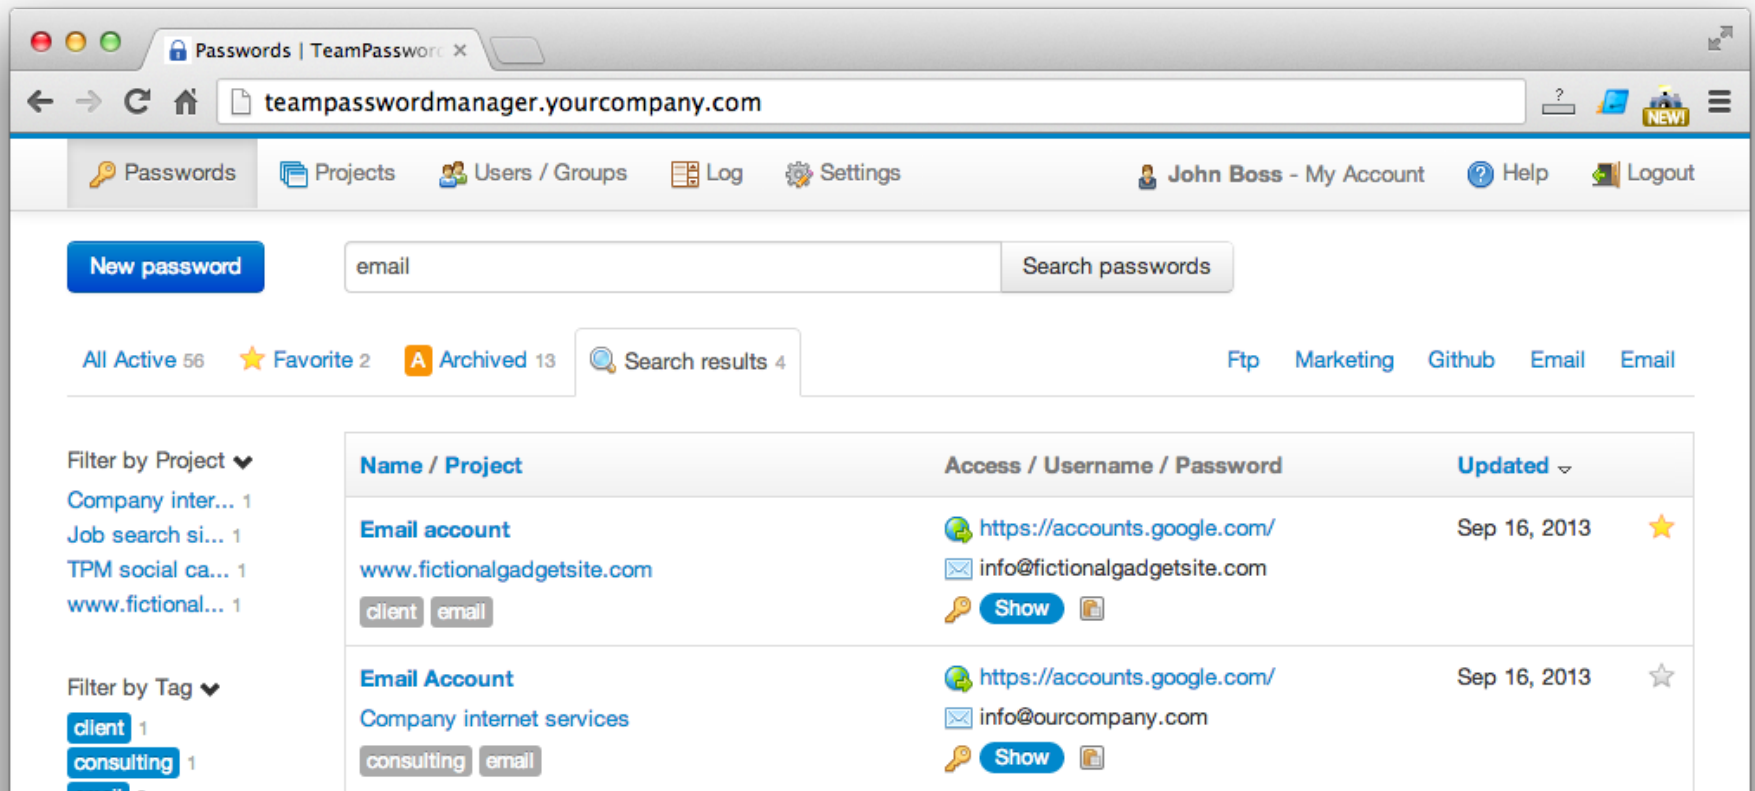

- Password manager for groups and projects
- Uses projects to group passwords
- Secure, fine grained password sharing
- Logs everything
- Tagging, searching and favorites
- Self hosted web application
- Free version for 2 users and 5 projects

Benefits: focus on your business, not on password management

- **Improved security:** unique password for every service, preventing password re-use
- **Better organization:** central password vault with searching and tagging
- **Better workflow:** focus on your work
- **Passwords don't get lost**

Screenshots (1/3)

Main passwords list

The screenshot displays the TeamPasswordManager web application interface. The browser address bar shows the URL `teampasswordmanager.yourcompany.com`. The navigation menu includes **Passwords**, **Projects**, **Users / Groups**, **Log**, and **Settings**. The user is logged in as **John Boss - My Account**, with **Help** and **Logout** options available.

The main content area features a **New password** button, a search input field containing `email`, and a **Search passwords** button. Below the search bar, the results are summarized as **All Active 56**, **Favorite 2**, **Archived 13**, and **Search results 4**. Filterable tags include **Ftp**, **Marketing**, **Github**, **Email**, and **Email**.

The password list is organized into columns: **Name / Project**, **Access / Username / Password**, and **Updated**. The list contains two entries:

Name / Project	Access / Username / Password	Updated
Email account www.fictionalgadgetsitesite.com client email	https://accounts.google.com/ info@fictionalgadgetsitesite.com client email Show	Sep 16, 2013 ★

Security

- AES-256 Encryption
- Bcrypt for users' passwords
- Code obfuscation
- Two-factor Authentication
- IP address blocking
- Self hosted (it's your data)

Testimonials

"It's easy to use, great one-time prices, self hosted, logs all actions!, and has great user management. I would recommend TPM to anyone that works with a team and needs to save passwords, it's as simple as that."

Justin Scarpetti from Webstract Marketing

"It gives our several offices a central and secure place to store sensitive passwords in a very easy way. Highly recommend."

Jono Walker from WalkerScott

"I'd been looking a long time for web password management software with the simplicity and essential features that Team Password Manager possesses. Now that we have it, I can't imagine how we got by without it. You won't find a better value out there."

Kevin Broughton from Sterling Bank Services

"TPM is easy to understand, simple to configure, and secure enough to confidently store sensitive information. I recommend this tool for any team responsible for managing many passwords that need to be accessible by many users."

Matthew Wallace, Senior Software Engineer
